Restaurant Business Intelligence Analytics Software Statistics 2024

Par **thiefcrazy98**, le **11/10/2024** à **19:16**

Hi colleagues, I have a question about analytics software for restaurants. I noticed that there are a lot of new solutions on the market in 2024. I'm curious, what tools do you find most useful for business analytics in a restaurant? I've heard of platforms like Toast and Square, but I don't know how effective they are in terms of data collection and analysis. Maybe you have personal experience with them or other programs? I'd love to hear your opinions!

Hi, your question is interesting, but we are a forum for French law students.
You should rather ask your question on business forum.
